SOFTWARE DEVELOPER

Junior Full Stack Developer with experience in frontend languages: JavaScript, HTML and CSS, as well as backend languages Java and Ruby. With 4 plus years of retail I possess strong skills in data analysis as well as team building that will help benefit my employers needs and further enhance my career goals.

TECHNICAL SKILLS

JavaScript, React, Ruby, Rails, Java, HTML/CSS, SQL, AWS, Bootstrap, Spring boot, PostgreSQL, Git, Netlify, Node.js, express, MongoDB

TECHNICAL PROJECTS

FureverHomes- Frontend| Backend | Demo
Web application that helps users find nearby pets to adopt and or rehome a pet if needed.
- Fetched from an external API to get available pets.
- Implemented Authentication to have users logged in be persistent and keep track of user data.
- Used Google maps API to display nearby shelters.
- Applied bootstrap for styling.

Space Cowboy- Frontend| Backend | Demo
Retro style video game that users can play, create an account and keep track of their scores.
- Integrated Kaboom.js library to create game.
- Used React as frontend for user UI.
- Implemented Rails as my backend for data storage.
- Retrieved data using Axios.

Nutrition Calculator- Frontend| Backend| Demo
Web application that allows users to input nutritional information and keep track of their nutritional intake.
- Implemented React for my frontend UI.
- Styled with bootstrap to create visuals.
- Integrated SQLite for data storage.
- Used Active Record in Ruby to assist in data storage.
